EDUCATION

University of Waterloo

Honours **Computer Science**; **Artificial Intelligence Specialization**; **Statistics Minor**

GPA: 4.0 – President’s Scholarship of Distinction

Waterloo, Ontario

Sep 2022 – Expected

AWARDS & ACHIEVEMENTS

National Mathematical Olympiad – Silver Medalist

International Combinatorics Olympiad (ICO) – Silver Medalist

SKILLS

Languages: Python, C/C++, Golang, Rust, Java, JavaScript, TypeScript

Frameworks/Libraries: Numpy, Pandas, PyTorch, Tensorflow, LLVM, MLIR, vLLM, React, Django, Next.js

Tools/Platforms: Git, Docker, AWS, Kubernetes, Redis, BigQuery, PostgreSQL, Pinecone, MongoDB

EXPERIENCE

Google

Software Engineer (Incoming) – Internship

Kitchener, ON

Jan 2027 – Apr 2027

Warp

Software Engineer (Incoming) – Internship

New York, USA

Sep 2026 – Dec 2026

Cerebras

Machine Learning Engineer – Internship

Toronto, ON

Sep 2025 – Dec 2025

- Built a **tensor-dump** comparison tool to validate parity between **CPU** and **CSX** inference runs for **GPT-OSS**
- Developed a **checkpoint-conversion** pipeline for all **inference** models with a peak memory usage of only **7%**
- Refactored the **inference pipeline** configs to enable compatibility with custom **tokenizers** and **image encoders**

Huawei Canada

Compiler Engineer – Internship

Toronto, ON

Jan 2025 – Apr 2025

- Designed an **LLVM** pass for automated software cache creation, tuning memory usage in **distributed systems**
- Analyzed **Redis**’s performance, identified hotspots, and implemented **prefetching** to reduce runtime by **20%**
- Developed an **MLIR** pass to annotate attention layers with **sharding** metadata, optimizing **tensor distribution**

Silverberry Group

Data Scientist – Internship

Vancouver, BC

May 2023 – Apr 2024

- Developed an **interactive agent environment** to model **medication-use** behavior prior to product release
- Vectorized 200+ hours of doctor-appointment audio in **Pinecone** using **OpenAI Whisper** and **Hugging Face**

RESEARCH

JetBrains

Research Intern – **Model Routing for Cheaper Code Generation**

Amsterdam, NL

Jan 2026 – Aug 2026

- Built an end-to-end pipeline for extracting OSS issues and generating solutions with a customized **mini-swe-agent**
- Developed 6 distinct types of **LLM-as-a-Judge** to predict human preferences towards the answers relative to price

University of Waterloo

Research Intern – **Interpreting Vision-Language Models** | [📄 Paper](#) | [🔗 Code](#)

Toronto, ON

May 2025 – Aug 2025

- Developed tooling to extract **intermediate** representations from **vision-language** models for **reasoning** analysis
- Ran **probing experiments** on **CLEVR** to evaluate **VLMs**’ internal representations of **primitive concepts**

Pingoo AI

Research Intern – **Building Trustworthy Generative AI for Diabetes Care** | [📄 Paper](#)

Remote

May 2024 – Aug 2024

- Examined the **reliability** of LLMs for diabetes-focused applications using **few-shot learning** and **fine-tuning**
- Created a **self-evaluation** loop to enable models to refine their own outputs, achieving **85%** human-rated accuracy
